Lantronix is pleased to announce the release of new and improved SLB firmware 6.7.0.0R12

Description and Extent of Change

The release includes new features and bug fixes including:

- Dialup Modem Connection Monitoring
- Script Management
- Web and SSH support for SHA2 and Higher
- OpenSSH and OpenSSL Upgraded

Reason for Change

New features and expanded capabilities

For SLB customers who would like to take advantage of the above new capabilities, the firmware and associated release notes are now available for download from our website: https://www.lantronix.com/products/lantronix-slb/#docs-downloads

More information about SLB Branch Office Manager is available on our website: <u>https://www.lantronix.com/products/lantronix-slb</u>

Effect of Change on Fit, Form, or Function

Functional changes only as noted above.

Updating your SLB

If you have procured previous revisions of the affected products or are running older version of firmware on your deployed SLB, we highly recommend that you upgrade to the newest version 6.7.0.0R12 using the firmware upgrade procedures outlined in the user guide or via ConsoleFlow – VPN-free centralized management software for out-of-band network operations.

If you have any questions, please contact your sales representative or Lantronix Technical Support at (800) 422-7044 or (949) 453-7198.
